

Collapsible core mold design and manufacturing support

Making collapsible core mold design and manufacturing

For many items such as pipe fitting, thread ring or under cut housing and components, collapsible core design

would help the parts to be ejected effectively.

And this this also a most effective and cost-saving manufacturing process for a plastic factory.

Per customer's parts design and structure, we can help customer to design collapsible core mold structure and

manufacturing such core fitting in mold with only an easy operation in production.

Welcome to send us any project which needs such device in mold ! **GET STARTED NOW !!**
