

Medical oxygen mask

Medical oxygen mask

- With our silicone mould experiences, we also manufacture silicone molding with great silicone molding stability which enables such silicone parts to resist extreme temperatures of heat and cold.
- We have rich experience in making silicone molds for producing FDA approval food grade silicone silicon products, medical grade silicone products, general grade silicon products and industrial grade silicone products.
- Hardness of our silicone molding material usually are 40~50 shore A. This can be discussed case by case.
- We work closely with our customers to provide **well designed silicone mold**, and **cost-effective silicone products**.
- We specialized in **high volume silicone mold making & molding, over-molding silicone onto plastics & metal parts**.
- Mold cavity no. & mold size: per customer's drawing and customer's requirement.

We supply with two type of silicone mold making services:

1. Silicone injection molding & mold:
 - We provide both cold runner silicone injection molds (molding) and hot runner silicone injection molds (molding).
2. hot compression silicone mold & molding:
 - We use this method to develop & produce silicone molded parts especially with metal reinforcement.

Liquid silicone molding

- Capable to making [silicone rubber molds](#) in hot compression way or injection way.
- Mold cavity and mold size can be discussed upon your own requirements.
- Produced from SGS, FDA approved silicone rubber and LSR materials.
- We usually use silicone rubber in the 40 to 70 shore A depending on customized requirements.
- Capable to manufacture tiny/small/little silicone molded parts for our customers.
- Supply with minimized flash free & mark free molded silicone products.
- Available in dealing with [OEM manufacturing](#), ODM manufacturing, customized production, contract manufacturing for silicone rubber mold & molding projects in Taiwan.

Silicone parts mold and molding application examples :

Our mold development for silicone has a wide range of product application lines as such : [ear plug](#), label, pad, gasket, protective frame, [mobile phone protective cover](#), keypad, silicone rubber cord, check valve ...etc.

More Applications:

- in Aerospace (silicone molded seals...)
- in Medical and health care (silicone molded membranes, seals...)
- in Electronic (connection insulators...)
- in Cooking / Baking (silicone molded spatulas...)
- in Agricultural (seals...)

Liquid Silicone Rubber ([LSR](#)) parts mold and molding application examples :

Available to produce extensive coloring or high transparency option in the finished molded LSR products.

Capable in managing medical grade, food grade, normal grade liquid .

Silicone molded products projects.

Our mold development for liquid silicone has a wide range of product application lines as such : baby nipple, pacifiers, seals, membranes, smooth surface LSR parts, respirator, medical mask, check valve, mouth guard, tension ring, diving masks...etc.

For mold making:

When making *mold project*, per customer's requirement for *mold steel* material, we choose the suitable mold steel grade for our customers. We have high quality *German and Japan imports mold steel* material to proceed our mold project making. Then, the *gating way* will be discussed, the *mold surface* will be discussed, the *mold cooling channel design* will be checked, the *operation style* will be discussed, the *molding machine size* will be determined and the *mold mechanism* in actual production movement will all be checked as well. Only after our mold engineers discussing with our customers for the *mold engineering* in detail, we will proceed with our mold making job.

Mold Order Process

Mold Shipping Process

Mold Finish

When you receive

For Mold Inquiry, Customer Must prepare:

1. Product drawing with 2D(.dwg)and 3D (.igs, .stp···etc)?
2. Advise product material (ex. Plastic ,rubber, silicone rubber or metal···etc)?
3. Molding machine tonnage size and platen size?
4. The cavity number of the mold that you want us to quote?
5. Mold steel grade that you want us to quote?
6. Hot runner or cold runner mold required?
7. Mold gating inlet preferred?
8. Mold ejection way preferred?
9. Other related information required ···(ex. Polishing , texture, engraving ···etc)

For Molding Products Inquiry , customer must prepare:

1. Products material required? (ex. Plastics, rubber , silicone , metal···etc)
2. Products quality required in total?
3. Delivery time required?
4. Post machining or not information? (ex. Chromed plate.., painting ···etc)
5. Assembly or not information?
6. Packing or not information?
